

Do you want your business and career to do even better? You need a profile picture that shows you at your professional best? You need images for your social media, websites or print?

I can help.

I offer three packages for you to choose from. Here's a quick summary... full details over the page!

Quick & Easy

For when you know you only need one headshot and you have minimum time to spare.

Three of the Best

It's always good to have a spare, right? A chance to try some different poses so you have alternatives to hand.

Knocked for Six

A portfolio to express your personal brand. Generous time for a change of clothes or to vary backgrounds, and the opportunity to capture some panoramic shots as well as more traditional square or portrait formats.

Six high quality images

120 minutes shoot time

Different set-ups to meet your needs – let's talk about options!

£440

Package 1: *Knocked for Six*

This is the full works: your opportunity for a complete personal branding update! Perhaps you're starting in business and you've got your own website as well as multiple social media streams to feed? Or maybe you've been promoted and want to refresh your images to reflect your new responsibilities? You'll love this package as it delivers a variety of images and maximum flexibility.

You get up to two hours of photography at a location of your choosing. Plenty of time to do both "standard" headshots with a plain background and to try out alternatives. You want to include a change of clothing? Or some shots showing the work environment, maybe even outdoors? How about some panoramic "header" images for your social media page as well as the square format profile picture? Let's do it!

Before I turn up, we're going to have a good chat about your ideas so that I understand your needs and can organise the shoot to deliver six stunning images. On the day itself, we'll include time to practise and checking the camera previews, so that you can be sure that you're getting what you want.

Look forward to seeing quick edits of the front-runners a few days after the shoot. You choose your favourites so I can then carry out more thorough editing of the final six. I'll be giving them all a "polish" to make sure that you are looking at your very best. Typically this involves removing any stray flecks of fluff from clothes, hiding shaving rash or pimples, reducing unwanted reflections, sharpening the eyes and giving the skin a subtle softening. Your final pictures will then be provided to you electronically at the best resolutions and sizes for your intended use.

Like a bottle of wine because ...

you get plenty to share and lots of choice, from that sparkling white to the complex red!

I provide discounts for groups, with prices varying according to numbers and whether you're all in one location or split over a number of sites. If you are interested in images of more than one person, please contact me to discuss your needs.

Three high quality images

60 minutes shoot time for different poses

£340

Package 2: *Top Three*

Maybe you don't need quite so much variety in location or style but you do still want a few images to choose from? This one's got you in mind!

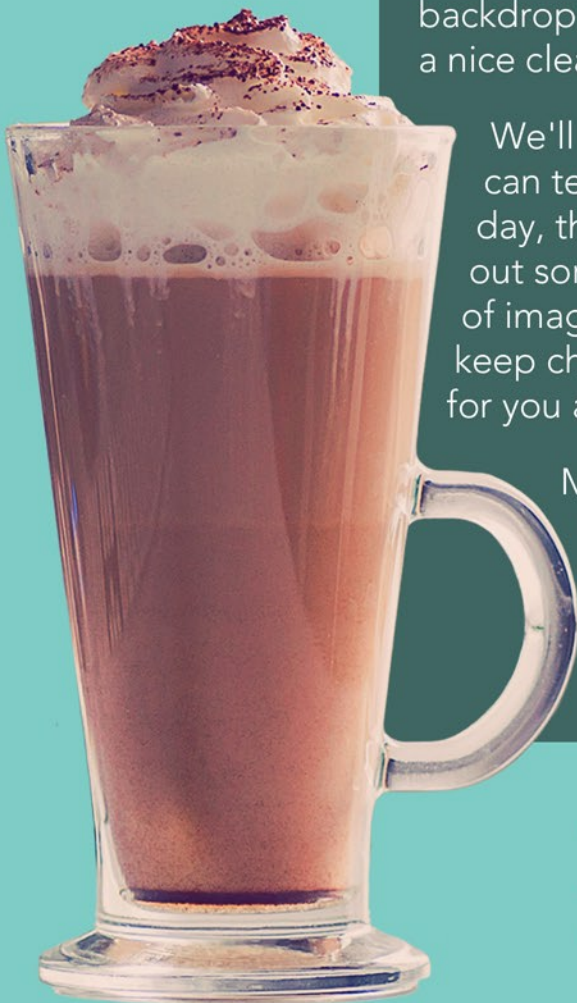

Perhaps you can't decide whether you want to show your "serious thinker" look or your "approachable and friendly" side? Why not have both ... in fact, why not have three different images so that you have a choice for your social media updates and other uses. I'll turn up at your office or other venue of your choice and will bring my portable backdrop and lighting to ensure that we get well-lit shots with a nice clean background.

We'll still have a bit of a chat before I turn up, so that you can tell me about what you are hoping to capture. On the day, the shoot will last up to 60 minutes. You'll enjoy trying out some different poses so we'll capture a good number of images to choose from. As with all my packages, we'll keep checking the camera previews to see what works best for you and to see if there are other ideas to try.

My after-shoot process is the same as for my Knocked for Six package. You still get to look through the first drafts and you can still expect the same quality of final images. The only differences are that there will be fewer images to look through and you'll choose three to go through to my final edit.

Like a hot chocolate because...

it's always comforting to know you've got one ready for when you need it!

Costs shown here include my travel for up to 20 miles from Sittingbourne in Kent and back – if you are further away, I charge additional mileage at £0.45/ mile, but I'll confirm final prices with you in advance, so no nasty surprises!

One high quality image

30 minutes shoot time so you're back to work as soon as possible

£240

Package 3: *Quick & Easy*

If you're sure that you only need one standard headshot and don't have much time to spare, then this will give you what you need. As with the other packages, I'll still turn up at your office or other venue of your choice with my portable studio to ensure a quality image. I'll shoot pictures with you for up to 30 minutes to make sure that you've got time to put work temporarily aside and to relax. Don't worry - we'll still look at the camera previews as we go along, so that you can see how I'm doing and to help you to adjust your pose or expression if you wish.

Guess what? Even though you're only choosing one image, the after-shoot experience is the same as my other packages. You still get to look at the best images before selecting your favourite and I still carry out my final edit to the same high quality.

Like an espresso because...

it's that immediate hit to set you up for the day before you dash onwards!

More images?

Whichever option you go for, my aim is to give you a choice of images that you'll love. If you decide that you want extra images from the shoot, they can be added on to your package for £50 each.

What next?

Maybe you know what you want and you're itching to book a session? Or perhaps you've still got some questions about how I work or what you need? Maybe you would prefer a quote for a custom package?

In any case, please get in touch for an informal, no-obligation chat about what would be best for you.
